Art Unit: 2154

DETAILED ACTION

1. Claims 1-28 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- 3. Claims 2, 4, 8, 10-13, 15, 19, 21, 23 and 27 rejected under 35 U.S.C. 102(e) as being anticipated by Howard et al (hereinafter Howard), US 6,697,865.
- 4. As per claim 2, Howard taught the invention as claimed including an active information model for an enterprise comprising:

Application/C ol Number: 09/765,964

Art Unit: 2154

At least one personal information portal wherein the personal information portal indicates an individual within the enterprise (col.2, lines 35-42, 64-67) and comprises:

- i. A storage mechanism configured to store information and a role of the individual wherein the role indicates first relationships of the individual with sources of the information and with at least one function that the individual performs within the enterprise (col.2, lines 35-42, 49-55, col.3, lines 7-28, 48-67, col.4, lines 1-7, 18-21, col.6, lines 40-67); and
- ii. An active agent configured to retrieve the role from the storage mechanism, exchange the information with the storage mechanism and the sources of the information based on the role, and process the information based on the role (col.1, lines 9-12, col.2, lines 35-38, col.3, lines 66-67, col.4, lines 1-7, 18-21, 43-44, col.5, lines 53-67, col.6, lines 1-12, 22-27, 40-67).
- As per claim 13, Howard taught the invention as claimed including a method of operating an active information model for an enterprise wherein the active information model comprises at least one personal information portal that indicates an individual within the enterprise (col.2, lines 35-42, 64-67), the method comprising:
 - a. Storing a role of the individual in a storage mechanism within the personal information portal wherein the role indicates first relationships of the individual with sources of information and functions that the individual

Art Unit: 2154

performs within the enterprise (col.2, lines 35-42, 49-55, col.3, lines 7-28, 48-67, col.4, lines 1-7, 18-21, col.6, lines 40-67);

- In an active agent included within the personal information portal,
 retrieving the role of the individual from the storage mechanism (col.5,
 lines 53-67, col.6, lines 1-12, 22-27, 40-67);
- c. In the active agent, exchanging the information with the storage mechanism and the sources of the information based on the role (col.1, lines 9-12, col.2, lines 35-38, col.5, lines 53-67, col.6, lines 1-12, 22-27, 40-67); and
- d. In the active agent, processing the information based on the role (col.5, lines 53-67, col.6, lines 1-12, 22-27, 40-67).
- 6. As per claim 21, Howard taught the invention as claimed including a software product for operating an active information model for an enterprise wherein the active information model comprises at least one personal information portal that indicates an individual within the enterprise and comprises a storage mechanism and an active agent (col.2, lines 35-42, 64-67), the software product comprising:
 - a. Active agent software operational when executed by a processor to direct the processor to retrieve a role from the storage mechanism, exchange information with the storage mechanism and sources of the information based on the role, and process the information based on the role wherein the role indicates first relationships of the individual with the sources of the information and functions that the individual performs within the

Application/C ol Number: 09/765,964

Art Unit: 2154

enterprise (col.1, lines 9-12, col.2, lines 35-42, 49-55, col.3, lines 7-28, 48-67, col.4, lines 1-7, 18-21, 43-44, col.5, lines 53-67, col.6, lines 1-12, 22-27, 40-67); and

- b. A software storage medium operational to store the active agent software (col.3, lines 12-20, col.5, lines 53-54).
- 7. As per claims 4, 15 and 23, Howard taught the invention as claimed in claims 2, 13 and 21. Howard further taught wherein the role indicates second relationships between elements in the information (col.5, lines 53-67, col.6, lines 1-12, 22-27, 40-67, features and functions accessing permission).
- 8. As per claims 8, 19 and 27, Howard taught the invention as claimed in claims 2, 13 and 21. Howard further taught wherein the active agent is configured to establish connections with the sources of the information based on the role (col.2, lines 56-67, col.5, lines 53-67, col.6, lines 1-12).
- 9. As per claim 10, Howard taught the invention as claimed in claim 2. Howard further taught wherein the active agent comprises a provider interface configured to exchange information between the active agent and the source of information (website, col.1, lines 9-12, col.2, lines 35-42, 49-55, col.3, lines 48-65, col.5, lines 53-67, col.6, lines 1-12, 22-27, 40-67).

Application/Corol Number: 09/765,964

Art Unit: 2154

- 10. As per claim 11, Howard taught the invention as claimed in claim 2. Howard further taught wherein the active agent comprises a consumer interface configured to establish connections with the sources of the information based on the role (col.2, lines 56-67, col.5, lines 53-67, col.6, lines 1-12).
- 11. As per claim 12, Howard taught the invention as claimed in claim 2. Howard further taught wherein the active agent comprises an execute interface configured to exchange and process the information based on the role (col.1, lines 9-12, col.2, lines 35-38, 56-67, col.5, lines 53-67, col.6, lines 1-12, 22-27, 40-67).

Claim Rejections - 35 USC § 103

- 12. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 1, 3, 5-7, 9, 14, 16-18, 20, 22, 24-26 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Howard et al (hereinafter Howard), US 6,697,865, in view of Davis et al (hereinafter Davis), US 5,937,388.
- 14. As per claim 1, Howard taught the invention substantially as claimed including an active information model comprising:

Application/C ol Number: 09/765,964

Art Unit: 2154

- a. At least one personal information portal having access to an active engine, an information service, and a persistent storage service (col.2, lines 35-42, 64-67, col.2, lines 35-42, 49-55, col.3, lines 7-28, 48-67, col.4, lines 1-7, 18-21, col.5, lines 53-67, col.6, lines 1-12, 22-27, 40-67),
- b. Said active engine associated with a datasource, and a relation; said active agent being related to an individual's role within at least one enterprise (col.3, lines 7-28, 48-49, col.5, lines 53-67, col.6, lines 1-12, 22-27, 40-67),
- c. Said relation associated with a rule and an association (col.3, lines 7-28, 48-67, col.4, lines 1-7, 18-21, col.6, lines 40-67).
- 15. Howard further taught to access commands and actions (col.6, lines 40-67, functions). Howard did not specifically teach that the active engine to associate with a workflow, said workflow associated with a command and an action and said datasource associated with a category. Davis taught an active engine associated with a workflow wherein commands and actions can be issued (col.3, lines 7-15, col.4, lines 15-19, 37-40, 47-57, col.5, lines 15-48, col.7, lines 24-26, 32-40) and that the datasource is associated with a category (col.4, lines 27-32, col.8, lines 15-17, col.17, lines 6-11). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Howard and Davis because Davis' teaching of workflow and data categorization would enhance the workflow in Howard's more effectively (Davis, col.17, lines 6-11).

Application/Colon Number: 09/765,964

Art Unit: 2154

- 16. As per claims 3, 14 and 22, Howard taught the invention substantially as claimed in claims 2, 13 and 21. Howard did not specifically teach wherein the role further comprises a plurality of categories of the sources of the information wherein the categories define access to and treatment of the information. Davis taught to categorized sources in the datasource defining access to and treatment of the information to provide more effective workflow processing (col.4, lines 27-32, col.8, lines 15-17, col.17, lines 6-11). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Howard and Davis because Davis' teaching of workflow and data categorization would enhance the workflow in Howard's more effectively (Davis, col.17, lines 6-11).
- 17. As per claims 5, 16 and 24, Howard taught the invention substantially as claimed in claims 2, 13 and 21. Howard did not specifically teach wherein the role comprises workflow that indicates movement of the information between the sources. Davis taught to comprise workflow that indicates movement of the information between the sources (col.1, lines 51-56, col.5, lines 15-48, 56-67, col.6, lines 1-6, 44-54, col.7, lines 24-26, 32-40). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Howard and Davis because Davis' teaching of workflow management and process help to process Howard's method to perform workflow control, monitoring data exchanging and security (Davis, col.1, lines 51-56).

Application/Colon ol Number: 09/765,964

Art Unit: 2154

- 18. As per claims 6, 17 and 25, Howard and Davis taught the invention as claimed in claims 5, 16 and 24. Davis further taught wherein the workflow comprises a plurality of commands that move the information between the sources (col.3, lines 7-15, col.4, lines 15-19, 37-40, 47-57, col.5, lines 15-48, col.7, lines 24-26, 32-40).
- 19. As per claims 7, 18 and 26, Howard and Davis taught the invention as claimed in claims 5, 16 and 24. Davis further taught wherein the workflow comprises a plurality of actions that modifies the information (col.2, lines 37-39, col.3, lines 7-15, col.4, lines 15-19, 37-40, 47-57, col.5, lines 15-48, col.7, lines 24-26, 32-40).
- 20. As per claims 9, 20 and 28, Howard taught the invention as claimed in claims 2, 13 and 21. Howard did not specifically teach wherein the active agent is configured to log events that the active agent has performed in the storage mechanism. Davis taught a workflow management system with active agent keeping logs of the actions performed in storage (col.2, lines 42-44, col.7, lines 41-45, 55-62). It would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teaching of Howard and Davis because Davis' teaching of logging the events helps Howard's method to prevent workflow restart when system or workflow failures occur (Davis, col.7, lines 41-45).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Comblement of Number: 09/765,964

Art Unit: 2154

Notani et al, US 6,397,191.

Barkley, US 6,088,679.

- 22. A shortened statutory period for reply to this Office action is set to expire THREE MONTHS from the mailing date of this action.
- 23. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenny Lin whose telephone number is (703) 305-0438. The examiner can normally be reached on 8 AM to 5 PM Tue.-Fri. and every other Monday..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee can be reached on (703) 305-8498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
